Professional Bakeware by TableCraft has a deep-seated history of bringing high quality products to market that are dependable and promote food safe practices.

Our Cast Aluminum items offer virtually unbreakable designs that conduct and maintain temperatures for an extended period of time. We offer 16 colorful DuraCoat™ Cast Coating options plus a natural finish. Mix and match serving pieces to create an eye catching presentation to enhance your brand image. Our DuraCoat™ features and benefits are listed below. For more information, please contact our customer service team or your local TableCraft sales representative.

Most of our Professional Bakeware (ProBake) products ship directly from our Willis, Texas location. Select items are also stocked in Gurnee, IL.

Our DuraCoat™ Cast Coatings are:

- NSF® listed
- Dishwasher safe, Natural Finish are Hand Wash Only
- Safe to use with foods containing less than 8% alcohol
- Safe for cold food temperatures as low as -20°F
- Not intended for hot well or steam table use

We recommend natural finish items only for all hot food applications.

TableCraft also provides a convenient and unique recoating program. Please contact your dealer for a quote and a recoating authorization (RCA) to refinish your cast aluminum serveware.

FAQ:

Are there any performance differences between Natural Finish v. DuraCoat™ Cast Coated bowls?

While both finishes are great for cold food storage and display, only non-coated or natural finish bowls can by used for hot food applications as well.

Looking for a Fresh Coat?

TableCraft provides a convenient and unique recoating program, so you can refinish your current templates for less than the cost of ordering new. Please contact your TableCraft sales rep for quotes and a recoating authorization (RCA) to refinish your cast aluminum serveware. Choose from 16 DuraCoat™ coatings or revert to natural aluminum finish.

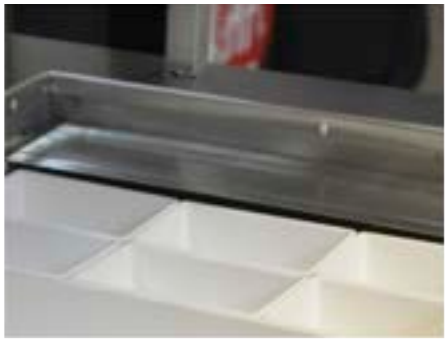
Simply done...

Our Simple Solutions™ Buffet System is as easy to assemble as 1-2-3 to keep your cold storage presentations organized and help your operation perform more efficiently.



DROP-IN TEMPLATES

Place templates on the NSF-7 ledge inside your cold well unit. Each template is equal to one well. Per example above, a four well unit will need four templates. These templates rest slightly above the well floor and are perforated for maximum air flow circulation around our food bowls.

CAST ALUMINUM BOWLS

These vessels are the same size and capacity as traditional food pans or hotel pans. They are available in a variety of sizes: Full, Half Long, Half, Third, Sixth and Ninth size, making them easy to confugure inside your well. They should fit tightly together to retain cold serving temperatures. If there are gaps between bowls, slide all bowls in same direction then fill gaps with adapter bars as needed.

SPACER BAR KIT

Kit includes one of each bar: 0.25", 0.5", 0.75", 1", 1.25" and 2". Use individually to fill gaps at the end of your well or use in any combination to replace vessels for smaller food service or create an alternative serving surface. Bars are manufactured to rest on the NSF-7 ledge inside your well and block cold air from escaping to optimize the efficiency of your unit.

Need help with your well configuration? Please contact your TableCraft sales representative.

Select single adapter bars are also available, see page 28 for more options.

PROMOTING SAFE SERVICE

Our **Safety Shields** are designed to promote **social distancing** and **safer food practices** without compromising the **customer experience.**

Both shield options feature integrated vents to allow air to circulate freely to keep butane stove or induction cooktop fans cool.

The CWACT2SHIELD works with the Double Butane Station (CWACTION5) shown above or other modular Action Station items. Made to order tabletops are also available in stainless steel and aluminum, see pages 64-65 for details.

SAFETY SHIELD PARTITIONS

FOR ACTION STATIONS

Our simple acrylic shields (shown to the left) can be used to protect servers and patrons during cooking and serving.

- Lightweight, easy to assemble and disassemble
- Light assembly, no hardware required
- Integrated venting helps keep induction cook-top cool during use
- Can also be used with other modular action station units such as single butane station (CWACTION6_) see product on page 61

TABLECRAFT RECOMMENDED CARE & USE FOR YOUR PRODUCTS

Acrylic
When cleaning your acrylic pieces, do not use abrasive cloths or paper towels. Always be sure to use a microfiber cloth to prevent scratching. To sanitize, use warm water mixed with sanitizing dish soap, Hydrogen Peroxide (3%-5% Concentration), or a bleach-water solution (2% Concentration of Bleach). To prevent damage to the surface of your acrylic shield, avoid using ammonia or alcohol based cleaners. Do not put in the dishwasher. Not microwave or oven safe.

Melamine
Dishwasher safe. Due to the size of some pieces, hand washing is best. We recommend to use a soft cloth and mild detergent, then towel dry. Not microwave or oven safe. Safe for temperatures up to 212°F/100°C.

Enamelware - Vitreous Porcelain Enamel Coated Steel
Enamelware is a time-honored traditional cooking and serving vessel that has been used for centuries in many ways. A good quality enamelware product can last for years under the right conditions and if cared for correctly. Just like any other porcelain piece in the market, porcelain enamel coated steel is not chip resistant and can become worn over the years. The steel substrate of the products is incredibly strong; however the porcelain coating is susceptible to chipping if handled roughly or repeatedly dropped on a hard surface.

To extend the life of your enamelware products, we recommend that you wash before use, do not use abrasive cleaning or scouring pads, do not place empty enamelware on heating element or allow to boil dry on induction unit, gas or electric hobs. Also, before use, coat with a light coating of cooking oil to protect the enamelware from staining. After use, to remove baked on food or stains, soak in warm soapy water and wash gently with non-abrasive liquid detergent.

Enamelware products are commercial dishwasher safe (high & low temp), induction and freezer safe, and safe for direct flame. Not microwave safe.

Porcelain
All pieces are dishwasher and microwave safe. We recommend to use a soft cloth and mild detergent, then towel dry.

Recycled Green Glass

Stainless Steel (Tri-Ply)
Stainless Steel cookware is dishwasher safe. However, we recommend hand-drying the cookware immediately after the rinse cycle or hand-washing and drying to preserve the original finish. Prolonged exposure to high heat settings may cause your cookware to discolor. To recondition your cookware or to remove stubborn spots and stains, use a nonabrasive pad and quality Stainless Steel cleanser such as Bar Keepers Friend®.

Cast Iron
Our line of Cast Iron is pre-seasoned, however it is still important to seal the surface of cast iron through a process called "seasoning". This makes the cookware less likely to stick, protects it from corrosion and rust, and prevents food from taking on metallic flavors. With proper care, a well seasoned pan will only get better with time and last for years. Wash the pan thoroughly in hot soapy water, then hand dry immediately. Using a cloth or paper towel, grease the pan thoroughly with a thin coating of vegetable oil or melted vegetable shortening. Be sure to coat the entire surface, including all corners. Heat the oven to 350ºF (176ºC). Place the cookware in the oven for 1 hour. Remove while hot and allow to cool to room temperature. Wipe away any excess oil, being careful not to scrub clean, then store. To preserve the seasoned finish, cast iron must be cleaned differently from other types of cookware. Cast Iron should never be placed inside a dishwasher or scrubbed with scouring pads or steel wool. Instead, wipe the pan clean with a sponge or dishcloth in hot water, without detergent. Any residue may be removed by boiling a little salt and vinegar in the pan, or by rubbing with a paper towel and coarse salt. Hand dry immediately after washing and brush with a thin coating of vegetable oil before storing. If stacking pans, place a paper towel between them. Pans should be seasoned from time to time when needed. Cast iron cookware is heavy and care should be taken when lifting; where available, use side handles for extra stability. Always use heat protection gloves as handles will become hot. Allow cookware to cool before cleaning. Cast Iron is not microwave safe.

Cast Iron
Rust? Don't Panic, it's not broken.
Without protective seasoning iron can rust. It's really easy to fix. Scour the rust, rinse, dry, and rub with a little vegetable oil. If problem persists, you will need to thoroughly remove all rust and follow our re-seasoning instructions.

Cast Aluminum–Natural
The "Naturals" are made of a food safe cast aluminum without coating and are NSF® approved. These items can endure temperatures from –20 up to 450ºF. For best results, we recommend to hand wash with a soft cloth, then towel dry immediately to maximize their beauty. Staining will occur if acidic foods are put into the natural products.

Cold Serving Cast Aluminum–Coated
All Coated Cast Aluminum products are NSF® approved and will endure temperatures from –20 up to 195ºF. (DO NOT BAKE in the coated cast aluminum products). If a defect in the coating appears, such as peeling or chipping, the product must be taken out of service immediately and repaired or replaced. The intended purpose of the color coated products is for cold serving & display only. They are not to be used in the preparation of food. Some environmental uses are, but not limited to, buffet lines, catered environments, and in food display cases. Do not cut directly on the products, as this will cause the coating to scratch. Do not put any of the products in an oven, on a stove top, under a heat lamp or in any other condition where the temperature exceeds 195ºF. Washing by hand is recommended, but when using a non-caustic detergent, the coating is dishwasher safe. Do not clean with scouring pads. Only use nylon or sponge pads. Regular dish washing will dull the coating. Do not use metal utensils on the color coated products. NOTE: Staining of all color coated products will occur especially if used with acidic foods. The lighter (white, sky blue, and gray) colors are more likely to show stains than darker colors. Staining of products is not covered under warranty.

Aluminum
Not Dishwasher Safe. Wash by hand using a cloth, warm water, and dish soap. Dishwashing will cause discoloration of your aluminum kitchenware.
