Hydro® HydroMaster Proportioners

HydroMaster drum or wall mounted proportioners automatically mix liquid cleaning and sanitizing concentrates with water and dispense the diluted solution into any container (autoscrubber, mop bucket, buddy jugs, etc.) Manual mixing of concentrates with water is time consuming and imprecise, the strength of the diluted solution may be too strong one time and too weak the next. Automatic dilution with the HydroMaster takes the variability out of the cleaning system, so the concentrated cleaning product consistently delivers maximum performance. Any size container of concentrate can be used with the HydroMaster because there's no need to tip the container to pour the contents. Mixes all-purpose and specialized cleaners, sanitizers. Mixes water-soluble floor waxes and strippers. Also degreasers, soluble oil and synthetic coolants, etc.
